RE: Street Closures Due To Crack Sealing

In the weeks to come we will be preparing city streets to be crack sealed from SE 15th Avenue south to Key Boulevard. It is imperative that you do not blow lawn clippings or other debris on the street surfaces to assist in expediting this process. Staff plans to begin crack sealing on August 19, 2019 through September 6, 2019. Staff will be conducting such maintenance between 6:30 a.m. and 2:30 p.m. on regular work days.

During the crack sealing of your street you may not have direct driving access to your home or business to allow for worker safety and maintenance. If you will need access to your vehicle during this time it may be best to park on other neighboring streets temporarily. Active maintenance areas will be clearly marked a business day in advance.

Refuse collection will run as regularly scheduled during construction. Please be sure your can is out by 6 a.m. during this time. City crews will handle any can repositioning needs during this time to ensure you receive service as long as your can is out.

Please don't hesitate to contact the Public Works Department at 938-8270, 938-8272 or 938-8274 if you have any questions.
